Claims 1-31 are in this application.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103© and potential 35 U.S.C. 102(f) or (g) prior art under 35 U.S.C. 103(a).

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 14-23, 27, 29 and 31 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claims 14 and 15 are indefinite in that they fail to further limit the claim from which they depend. By removing previously claimed limitations, the resultant claim(s) (i.e., 14 and 15) are necessarily broader, and accordingly fail to distinctly claim that considered to be inventive. In claim 18, line 4, "said axis" has no prior proper antecedent basis. Claims 27, 29 and 31 are inaccurate per se as the interlock does not "permit" rotation.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-13 and 18-21, 26 and 28 are rejected under 35 U.S.C. 102(b) as being anticipated by Zaiser. See figures 5 and 7, et al.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 22, 24 and 25 are rejected under 35 U.S.C. 103(a) as being unpatentable over Zaiser in view of Sharp. Zaiser shows the combination substantially as claimed including a clamp element 35 having a tip portion for engagement with a grooved knife component. Zaiser does not show that the force exerting component of the clamp is a threaded member. However, for purposes of better controlling clamping forces, it is well-known to utilize threaded elements as is so clearly taught by Sharp. To have reconstructed the device of Zaiser so as to have provided threaded members for the purposes of providing clamping, would have been obvious in the sense of 35 USC 103.
